

A monthly update covering people, events, research, and key developments

The Upcoming Year In Epidemiology - 2025

We are pleased to present our annual calendar of worldwide epidemiology, biostatistics, and public health events. As always, these events are categorized as conventions/meetings, short courses, and Summer/Winter programs. The list is built based on submissions from the sponsoring entities, events that have been historically listed in our calendar, and web searches to uncover new events to add to the list. This year we have highlighted events in 20 countries around the world including a record 30 summer and/or winter programs.

Our 2025 calendar shows the community has finally rebounded from COVID-19 with the final events returning this year. As we have expanded our biostatistics and public health coverage, this year we have over 200 events in the list which represents a 50% increase over 2024.

While we make a concerted effort to unearth events, we often miss some that should have been added. If you are hosting an event that you would like included in the web based version of our calendar please submit it [here](#) and we will add it to our online calendar. That will also ensure that we will search for it when we build the 2026 calendar next year.

A special note for summer programs: while your events are listed here, our February issue will be focused on your programs and we need additional information from you. Please contact michele@epimonitor.net so we can update your program profile.

Look forward to seeing you in 2025!

Katelyn Jetelina, PhD, MPH

Open Rank Faculty Tenure-Track

The Department of Epidemiology within the Geisel School of Medicine at Dartmouth, the Dartmouth Cancer Center, and the Center for Molecular Epidemiology invites applications for an open rank tenure-track position. We seek applicants to lead an independent, innovative research program in areas of cancer-focused epidemiology. Possible areas of focus include molecular, life course, nutritional, and/or environmental epidemiology and/or the exposome. Research in novel areas of cancer epidemiology related to DCC's Precision Cancer Prevention initiative are particularly encouraged. The Dartmouth Cancer Center (DCC) is an NCI-designated Comprehensive Cancer Center, and the Center for Molecular Epidemiology is a NIGMS Center for Biomedical Research excellence. Both offer a dynamic and interactive environment with a commitment and resources to support research excellence and career advancement. The faculty appointment will be in the Department of Epidemiology, with membership in the DCC Cancer Population Sciences research program with additional potential for membership in the Center for Molecular Epidemiology and other programs throughout the medical school and college.

Qualifications

Candidates must have a Ph.D. and/or M.D. degree and relevant postdoctoral research experience.

Application Instructions

Applicants should upload a cover letter, a curriculum vitae (without impact factors), a description of proposed research (3 pages or less), a teaching statement, and a statement on how their teaching, research, service, and/or life experiences prepare them to advance diversity, equity, and inclusion at Dartmouth through the interfolio link provided. Three referees should provide letters of recommendation. *Consideration of applications will begin on November 15th, 2024, and continue until the position is filled.*

Memorial Sloan Kettering
Cancer Center

Postdoctoral Fellows / Oncology-Focused Population Sciences

MSK welcomes applications for Postdoctoral Fellows who wish to pursue training in Oncology-Focused Population Sciences. MDs and PhDs who wish to pursue advanced research training and receive intensive mentorship in any area of cancer-focused population sciences are encouraged to apply.

OPTICS (Oncology focused Postdoctoral Training In Care Delivery and Symptom Science) is funded by an NCI-T32. It affords trainees protected time and access to resources to support intensive focus on an impactful research project. The program focuses on training aligned with one of 4 themes: Data Science, Risk Mitigation, Symptom Science or Care Delivery. Fellows do not need to have a specific project or mentor identified to apply.

This is a great opportunity for MDs or PhDs interested in pursuing a research career in any area of cancer-related population sciences, including but not limited to cancer data science, symptom control and survivorship, health informatics, cancer care delivery, implementation science, and epidemiology.

To apply, please head to our website, www.mskcc.org/optics, and submit your application materials to Samantha Vasquez at vasques2@mskcc.org by Friday, January 31, 2025. You must be a researcher with a MD/DO or PhD/ScD and a United States citizen or permanent resident (green card holder).
