

The Year In Epidemiology - 2019

Our 2019 calendar of key events in epidemiology contains 142 listings to help you stay in touch and up to date on the latest developments in the field. An observation we have made in preparing the 2019 calendar is that the diversity of events has diminished. Also, the total number of listings is significantly lower than last year (175 events).

Here is the breakdown of listings by type of event:

Event type	Quantity
Conferences	55
Meetings	6
Short Courses	57
Summer Programs	
• Northern hemisphere	17
• Southern hemisphere	2
Winter Programs	
• Northern hemisphere	5
• Southern hemisphere	0
Other	0
Total	142

As you can see, all of our listings fall into only 5 categories. Gone are listings for one-time special events, online courses, webinars, hackathons, and other unique offerings. Based on recent developments, we did endeavor to identify events described as population health or data science gatherings, but only found two new listings to include. We excluded population health management listings.

If your upcoming event is not listed, use the submission form at <https://bit.ly/2BuiEJj> to have it included in an updated version of the calendar published online AND in our EpiGram email alerts sent to all subscribers.

Associate Dean for Research

Rollins School of Public Health
Emory University

The Office of the Dean in Emory University's Rollins School of Public Health (RSPH) seeks visionary candidates for the position of Associate Dean for Research. This faculty position will be full-time with approximately fifty percent dedicated to the Associate Dean role and the remainder to research and teaching. The Associate Dean staffs the School's Research Advisory Committee (RAC) and represents the School on Research committees at the Woodruff Health Sciences Center and University levels. The principal role for the Associate Dean is to facilitate and enhance the capacity of faculty and advanced trainees to successfully compete for intramural and extramural financial support and conduct research. The office is a clearinghouse and resource for internal pilot grants, provides grant writing support and works closely with the Office of Academic Affairs on graduate and post-doctoral training and support. The office assists in identifying opportunities for cross-departmental and inter-school research collaborations and works closely with the Assistant Dean for Research Administration on regulatory and reporting issues.

The successful candidate will be a highly respected leader with a strong record of funded research in an area related to public health and will have the necessary record to be appointed as a faculty member at the level of Professor on the RSPH faculty. We encourage applicants from diverse backgrounds and with diverse research interests.

Applicants must apply to the Emory University Careers Website: Job #[29007](#). Applicants should include a letter of interest and CV, which may also be emailed to: Dr. Lance Waller, Search Committee Chair, c/o Nancy Sterk (nsterk@emory.edu). Please include Job Vacancy # 29007.

Applications will be kept confidential and references will not be contacted without the permission of applicants.

The starting date is July 1, 2019 (negotiable) and salary is commensurate with qualifications. Review of applications will begin immediately and continue until the position is filled.

Emory University is an Equal Opportunity / Affirmative Action / Disability / Veteran Employer.

Tulane University

Tenure Track Faculty Position in Genomic Epidemiology

Department of Epidemiology
Tulane University School of Public Health and Tropical Medicine

The Department of Epidemiology at the Tulane University School of Public Health and Tropical Medicine and the Tulane University Translational Sciences Institute are seeking outstanding applicants for a tenure-track faculty position in genomic research of cardiometabolic diseases. The Tulane University Translational Sciences Institute has been funded by the NIH to provide 50% salary support and substantial research funds to promising junior faculty investigators. We offer a supportive environment for faculty to develop their research projects, in cooperation with other research centers and departments at the Health Sciences Campus.

Qualifications for Assistant Professor candidates include a doctoral degree in genomic epidemiology or statistical genetics or an MD with genomic epidemiology training, post-doctoral experience, demonstrated potential to establish independent research programs, evidence of excellence in teaching, and interest in collaborative research. Review of applications will begin as soon as possible and applications will be accepted and reviewed until the position is filled.

Applicants should send a cover letter, complete resume, and at least three letters of recommendation to:
